DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a process of two stage plasma gasification.

Group II, claim(s) 20-25, drawn to an apparatus for converting waste into fuel gas.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of group I relates to a two-stage plasma gasification process of organic and inorganic components to convert all soot and organic materials into CO, CO₂ and H₂. The invention of group II includes an apparatus for converting waste into fuel gas using plasma arc furnace and feeding air, O₂ and/or steam in metered amounts to convert all into CO, CO₂ and H₂. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, invention I can be

practiced by another and materially different apparatus. For instance, invention I can be used or practiced by materially different, another gasifier having higher temperature in primary and secondary combustions, instead of plasma combustion to achieve similar end results.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
